Skills

- Programming
Languages: Python, C#, SQL, JavaScript (React), HTML/CSS.
- Concepts & Architecture: Object-Oriented Programming (OOP), Client-Server
- Architecture, RESTful APIs, AI-Native Workflows, Autonomous Agents, Secure Code Design.
- Databases: MySQL, MongoDB.
- Tools & Platforms: Git, GitHub, Docker, VS Code, Linux environments

Languages

- Hebrew
- English

Omer Zaadi
Software Developer

Computer Science B.Sc. graduate with a strong foundation in software development, data-driven workflows, and secure system design. Passionate about building impactful production systems, mixing rigorous engineering fundamentals with the smart, critical integration of AI/LLM tools (Anthropic API, custom agents). A former Air Force Commander bringing a high sense of ownership, fast learning adaptability, and a proven track record of solving complex problems under pressure

Key Projects

- Cyber Security & Cloud Analysis** | *Independent Research*
Designed and developed an **LLM-based autonomous agent** engineered to analyze, audit, and optimize complex cloud configurations. Utilized **advanced prompt engineering** and structural parsing to automatically identify structural flaws and data misconfigurations, generating optimized, remediated code definitions to ensure architectural quality. Demonstrates strong independent problem-solving and the critical application of AI to automate backend processes.
- Crew Management System** | Full-Stack Developer | [LINK](#)
Built a comprehensive, end-to-end management system with complex operational workflows. Developed a secure backend using **FastAPI** (with JWT authentication and Bcrypt hashing) and a responsive frontend using **React**. Designed an optimized **MySQL relational schema** for real-time dependency tracking and integrated the **Anthropic API** to build an intelligent engine for automated resource allocation.

Work Experience

- Airforce Crew Chief, Israeli Air Force**
February 2017 - December 2025
 - High Ownership & Leadership:** Led technical teams in high-pressure, mission-critical environments, managing complex schedules to ensure 100% operational readiness.
 - Process Optimization:** Streamlined complex workflows and technical documentation practices, significantly improving team efficiency, delivery speed, and process quality. .
 - Crisis Management:** Accountable for rapid, analytical decision-making and real-time troubleshooting in time-sensitive, high-stakes operational scenarios.

Education

- Computer Science B.Sc., Holon Institute of Technology (HIT)**
2022 - 2025
Relevant Coursework: Data Structures, Algorithms, Database Systems, Software Engineering, OOP.
- Mechanical Engineering Technician Diploma, ORT Rehovot**
2015 - 2016
